🌐 ANURAG-PATHAK | in anuragpathako | 🐦 _Anurag__Pathak

🎓 EDUCATION

GL BAJAJ INSTITUTE OF TECHNOLOGY AND MANAGEMENT

BTECH CSE(AI) 2020-2024

ARMY PUBLIC SCHOOL

INTERMEDIATE 2018 - 2019

ARMY PUBLIC SCHOOL

HIGH-SCHOOL 2016 - 2017

🔧 SKILLS

PROGRAMMING

C++, C, Python, Javascript,
C-Sharp, .NET
Data Structures and Algorithms

FRONT-END

HTML, CSS, Javascript, Reactjs,
Next.js

BACK-END

Javascript, Nodejs, Expressjs,
MongoDB, MySQL

MACHINE LEARNING

Python, Pandas, Numpy, Scikit-Learn
Matplotlib

OTHERS

Git, Github, Bash, Linux

📖 COURSEWORK

Data Structures
Design and Analysis of Algorithms
Operating System
Database Management System
Computer Networks
Machine Learning
Object Oriented Design

💼 EXPERIENCE

GRAPECITY

September 2023 – present | Noida, India

- Worked on .NET Framework.
- Worked on JavaScript and TypeScript.
- Worked on their Award-Wining Javascript component 'Wijmo'

Software Engineering Intern

🔗 PROJECTS

WEB OS

Github [↗](#)

- This is a project inspired by the Ubuntu OS.
- It has multiple small games embedded in the WebApp
- It gives a wholesome experience of an Operating System on a Browser
- Techstacks used: **Next.js**, **React.js** and **Tailwind CSS**
- This is the live demo of the website **DEMO** [↗](#)

ECOMMERCE APP

Github [↗](#)

- This is a complete **MERN stack** App, with authentication and payment gateway
- This is a **Single Page Application** in **React.js**
- I used **Node.js** and **Express.js** to create a Backend
- This is the live demo of the website **DEMO** [↗](#)

TEXT EDITOR

Github [↗](#)

- I used **.Net Framework** for creating library Which has all the functionality.
- Used **WinForms** in .NET Framework to create UI
- Used **Adapter Design Pattern** to integrate library and UI
- The library is customizable, it can be imported to implement a text-editor as a **Web app**, **Mobile app**, or **MacOS app**.
- I implemented the library for the **Windows Desktop App**

WEATHER-WIDGET-APP

Github [↗](#)

- This Web app gives **Weather Report** of any city
- I used **HTML**, **CSS**, **JavaScript** to create the website
- The website is fully responsive
- I used **API** calls to Fetch Data and Present it on the front end
- This is the live demo of the website **DEMO** [↗](#)
